# Modelling of the Interaction of the Different Vehicles and Various Transport Modes

# **Lecture Notes in Intelligent Transportation** and Infrastructure

## Series editor

Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences, Warszawa, Poland

The series "Lecture Notes in Intelligent Transportation and Infrastructure" (LNITI) publishes new developments and advances in the various areas of intelligent transportation and infrastructure. The intent is to cover the theory, applications, and perspectives on the state-of-the-art and future developments relevant to topics such as intelligent transportation systems, smart mobility, urban logistics, smart grids, critical infrastructure, smart architecture, smart citizens, intelligent governance, smart architecture and construction design, as well as green and sustainable urban structures. The series contains monographs, conference proceedings, edited volumes, lecture notes and textbooks. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable wide and rapid dissemination of high-quality research output.

# **Contents**

Technology in Transport Network	1
Shaping Quality of Service in Freight Transport	105
Application of Artificial Neural Networks for Short-Term Forecasting of Container Flows in Kazakhstan  Zhomart Abdirassilov, Aleksander Sładkowski, Aliya Izbairova and Sugerali Sarbaev	131
Measuring Performances of Multi-mode Marshalling Yards	159
Intermodal Terminals Network Modelling	185
The Danube River, Multimodality and Intermodality  Velizara Pencheva, Asen Asenov, Aleksander Sładkowski, Ivan Georgiev,  Ivan Beloev and Kamen Ivanov	233
Key Instruments of Sustainable Urban Mobility on the Example of the Silesian Metropolis	289
Mini-roundabouts for Improving Urban Accessibility	333
