 Springer

Studies in Systems, Decision and Control

Volume 563

Series Editor

Janusz Kacprzyk , Systems Research Institute, Polish Academy of Sciences,
Warsaw, Poland

Editorial Board

Dmitry A. Novikov, Institute of Control Sciences (Director), Russian Academy of
Sciences, Moscow, Russia

Peng Shi, School of Electrical and Mechanical Engineering, University of
Adelaide, Adelaide, SA, Australia

Jinde Cao, School of Mathematics, Southeast University, Nanjing, China

Marios Polycarpou, KIOS Research Center, University of Cyprus, Nicosia, Cyprus

Witold Pedrycz, Faculty of Engineering, University of Alberta, Alberta, Canada

The series “Studies in Systems, Decision and Control” (SSDC) covers both new developments and advances, as well as the state of the art, in the various areas of broadly perceived systems, decision making and control—quickly, up to date and with a high quality. The intent is to cover the theory, applications, and perspectives on the state of the art and future developments relevant to systems, decision making, control, complex processes and related areas, as embedded in the fields of engineering, computer science, physics, economics, social and life sciences, as well as the paradigms and methodologies behind them. The series contains monographs, textbooks, lecture notes and edited volumes in systems, decision making and control spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the worldwide distribution and exposure which enable both a wide and rapid dissemination of research output.

Indexed by SCOPUS, DBLP, WTI Frankfurt eG, zbMATH, SCImago.

All books published in the series are submitted for consideration in Web of Science.

Contents

Key Artificial Intelligence and Digitalization Solutions Towards Vision Zero in Road Safety	1
Apostolos Ziakopoulos and George Yannis	
Usage of Specialized Intellectual and Artificial Intelligence Systems to Improve Railway Transport Technologies	27
Vladyslav Skalozub, Ihor Zhukovytskyi, Dmytro Bosyi, and Valerii Lakhno	
Numerical Assessment of the Railway Network Functioning	123
Wojciech Kamiński and Aleksander Sladkowski	
The Impact of Digitalization and Method of Container Transshipment on Intermodal Freight Transport	191
László Vida and Béla Illés	
Improvement of Freight Routes: Innovative Digital Solutions for Long-Term Planning in Kazakh Rail Transport	247
Madiyar Sultanbek, Nazdana Adilova, and Aleksander Sladkowski	
Systems for Planning and Operation of Electric Buses for Public Transport of Passengers in Cities	309
Velizara Pencheva, Asen Asenov, Ivan Georgiev, Aleksandar Georgiev, and Pavel Stoyanov	
Intelligent Logistics Mobile Robot Automatic Navigation Key Technology and Its Application	375
Xuelin Wang, Hao Chen, Kailan Gao, Huixin Wei, and Changlin Wang	

Supply Chain Challenges in Wartime: LLC “Raben Ukraine” Key Study 433
Antoniia Bieliatynska, Kristina Čižiūnienė, Iryna Klymenko,
and Jonas Matijošius

Machine Learning in Road Freight Transport Management 485
Artur Budzyński and Aleksander Sładkowski
